

## SmartSpot 8800 APN Reset Guide

**Step 1:** Connect to the hotspot, open a web browser and navigate to <http://192.168.1.1>

*Note if you cannot pull up the admin page, ensure you are properly connected to the device's WiFi network and have no other internet source connected to your end device.*

Click Sign In (located in the upper-right).

Enter the admin password then click Sign In.

*Note By default the admin and Wi-Fi passwords are the same. To verify via the device's external LED, navigate: Menu > Help > Jetpack Admin Website.*

**Step 2** From the menu options, click Jetpack Settings.

**Step 3** Click the Advanced tab, if presented, review the warning then click Continue.

Click Networks.

From the APN Settings section, enter the APN: kajeet.gw12.vzwentp

**Step 4** Click Save Changes.

*Note APN changes may cause loss of data connection or require restarting the device.*
